

EMS Alert # 10-02

Methylprednisolone

Effective immediately, methylprednisolone is a standing order medication for adult patients with an allergic reaction producing any of the following signs:

- Shock
- Severe hypoperfusion
- Critical airway
- Systolic blood pressure less than 90 mmHg

The approved standing order dose is 60 mg – 125 mg IVP.

Do not delay subcutaneous epinephrine administration in order to administer methylprednisolone.

Attached are the update pages for the 2010 BioTel Treatment Guidelines.
